

# Hydro Harvest Farms

## You Never Know Who Will Drop In at the Farm

We love this season. Our Farm Families have made our Pumpkin Patch a tradition for so many years. We have watched the children grow from the “Babies First Pictures” into beautiful High School Students. We are so proud to be a part of the fond memories they have of what they did, what they learned, who they met, and how the simple things in life are the most cherished. We truly thank all of our farm families for making the Pumpkin Patch, Santa and our U-Pick farm part of those memories. Santa will be visiting the farm in December! Bring the kids, Grandma, even Fido!

### Santa Appearances:

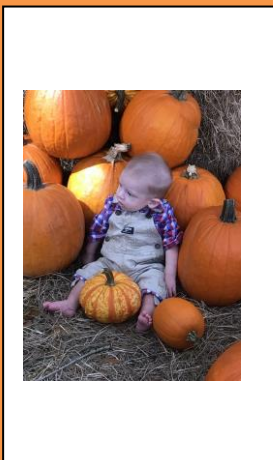

Nov 30 from 1-4

Dec 1 from 1-4

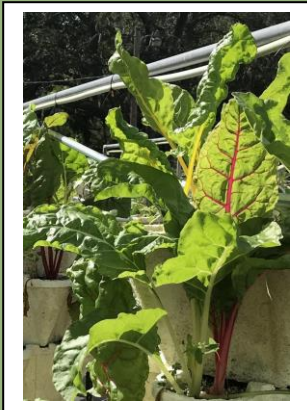

Dec 7 from 1-4

Dec 8 from 1-4

It's Free and No Stress for the little ones!

## *Free Hydroponic Growers Class*

### **FREE CLASS Nov 2, at 11.00**

We have been growing using Hydroponic Methods for 14 years. One thing we know that is true, it is the only way to grow, especially in Florida. Growing food is a science. You depend on quality of soil, nutrients, sun, pest control and weather. Hydroponic growing methods eliminate the need for optimal soil conditions, which most of us don't have. It eliminates the guess work of what nutrition your plants need in order to grow. The plants grow in the healthiest conditions, which interpret to the use of very little pest issues. Also, our finicky weather patterns, too much rain or not enough rain are handled by the automatic nutrient water system.

Come see how you can have a garden and enjoy the flavor of fresh picked food.
